

The SaaS Management Platform that simplifies how MSPs work

Gain 360° control over your clients SaaS applications with a platform that makes it easy to manage user access, analyze utilization trends, and automate app provisioning processes to make your MSP operations run more efficiently.

360 SaaS Control

Automated Provisioning

Access Governance

Cost Optimization

Centralize your clients' SaaS apps and gain 360° control

Managing multiple clients software assets on spreadsheets is not a scalable solution and poses inaccuracy risks. Josys integrates with hundreds of popular SaaS apps data sources to instantly connect your clients employee data with their provisioned licenses. With Josys centralized dashboard, MSPs can control user access levels, and better manage their clients software subscriptions.

Automate provisioning for fast and seamless onboarding experiences

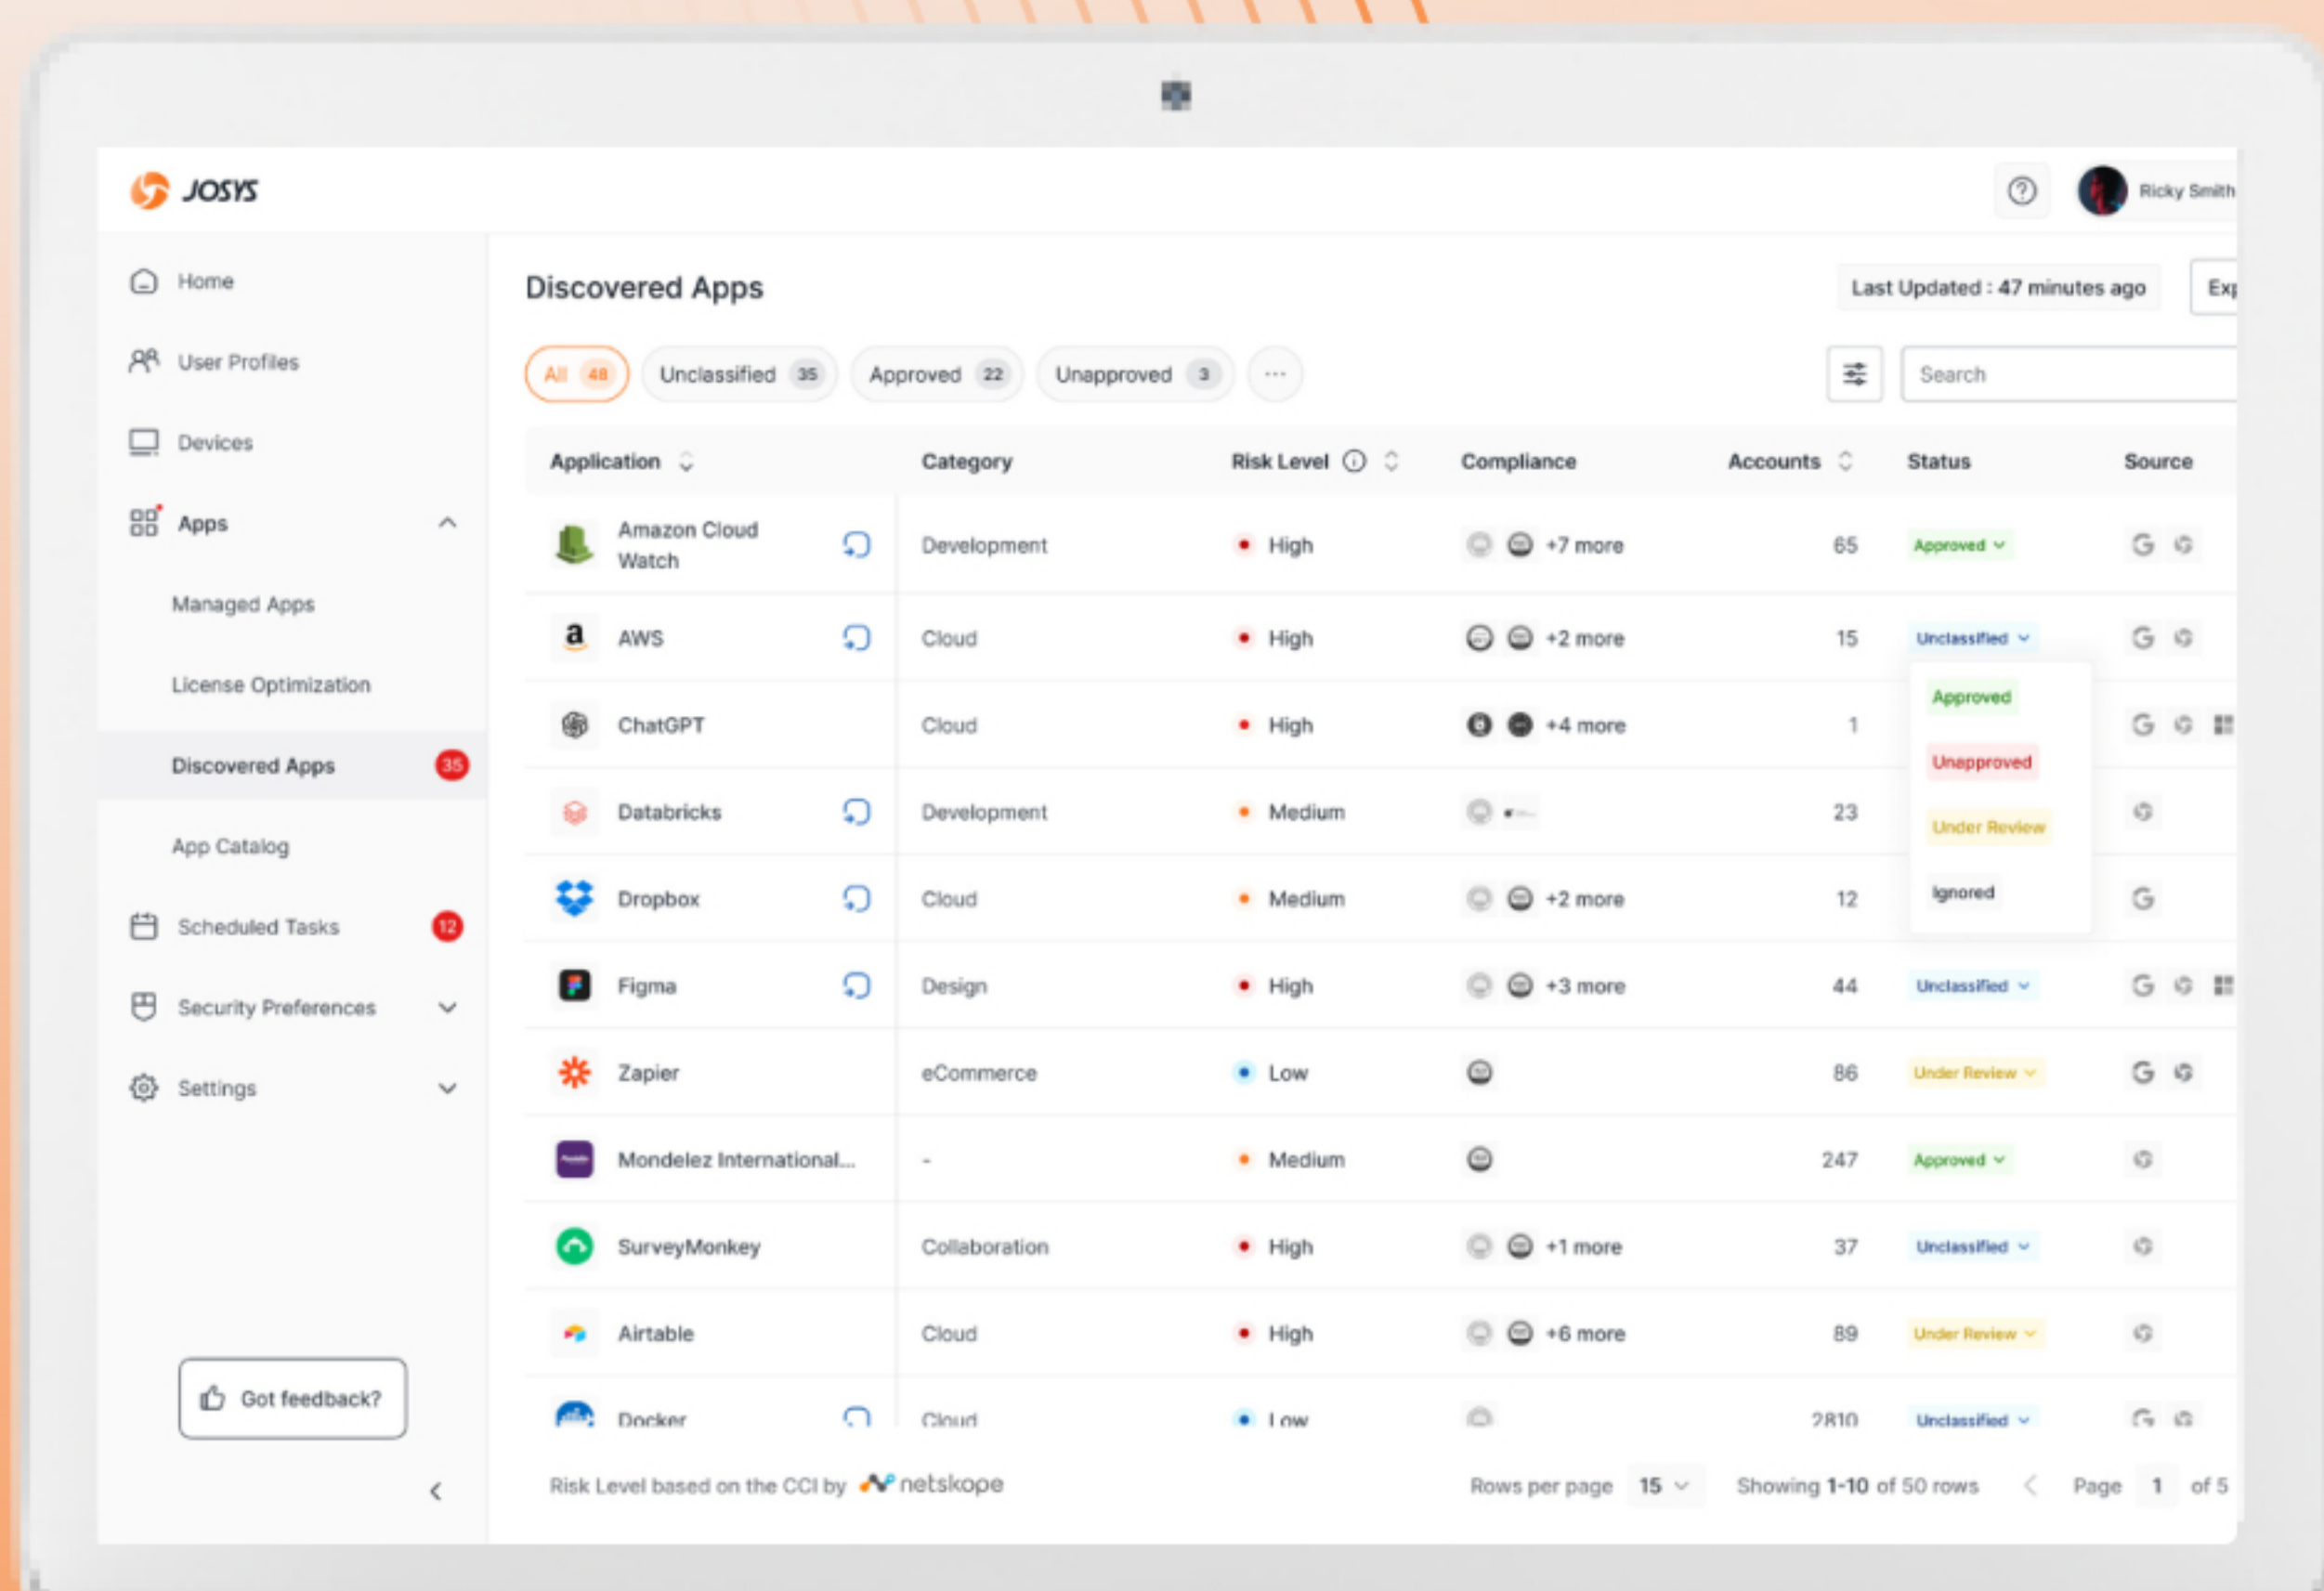

For growing MSPs, onboarding requests can be a manual and tedious task. Josys provides workflow automations to expedite app provisioning during employment transitions. Proactively manage requests by bulk provisioning multiple apps at once, scheduling employee access dates, and deprovisioning access during offboarding with a single click.

Strengthen SaaS governance

With SaaS sprawl on the rise, oversight of your clients access permissions can become less centralized and pose a security risk to your clients business. With Josys, MSPs are in control and accountable for all employee access permissions. Josys tracks SaaS usage, surfaces shadow IT, and automates role based permissions to implement tighter controls and oversight.

Track optimize SaaS expenditures

When SaaS procurement is non centralized and underutilized, costs can skyrocket unknowingly. By tracking subscriptions and utilization data with Josys, MSPs can identify unassigned, underutilized, or redundant licenses to right size purchasing and save during contract renewal periods.

We are impressed with Josys' efficiency in managing SaaS accounts and IT devices. The automation and visibility it provided cut our man hours in half... Josys has significantly contributed to making our security management easier and more efficient.

— Nishiura Kawasaki, Coconala

The Multi- Tenant SaaS Management Platform

Josys is the only SaaS management platform designed for MSPs.

License Management

Track your clients application subscriptions, licenses allocated, and SaaS expenditures for a holistic overview of each clients software
