Using the App

3

3.1 Select "Create New Preset" button.

3.2 Select VintageDim® preset type.

3.3 Change the preset name and description to your own.

3.4 Set the CCT values of your light source or choose from preset Fixture CCTs option.

3.5 Adjust sliders for maximum and minimum CCT at the bottom of the screen. This calculates the correct curve using the values you set in this section.

3.6 Save preset.

3.7 Select your new user preset from the main list.

3.8 Press Program button.

3.9 Place phone directly on the VintageDim® module. Phone will play a tone when programming begins. Programming is complete when you hear a single beep and see the "Programming Successful" screen.

If the driver was off during programming, simply power on and the driver will work according to the new program. If the driver was on during programming, it will need to be power cycled for new programming to become active.

* Lid of driver case must be removed.
