**Attention:** Always test lineLED before installing. Connect lineLED to power supply to ensure it is working properly and no damage has occurred during shipping.

1

## 1.1 Clean the area thoroughly where the lineLED will be installed.

Remove the paper backing from the lineLED and firmly press down making sure there are no air bubbles that can cause surface irregularities. **Do not remove the adhesive, removing the adhesive may cause arcing of the lineLED tape.**

2

## 2.1 If length of the lineLED needs to be adjusted on site, simply cut the LED strip in between solder pads. Always cut from end with no connector/wire leads.

5

## RECOMMENDED LAYOUT FOR MULTIPLE ADJACENT RUNS OF LINELED FED WITH SEPARATE POWER SUPPLIES

- 5.1 Position power supplies either in the middle of two runs or at the opposite ends.
- 5.2 If length of the lineLED needs to be adjusted on site, simply cut the LED strip in between solder pads. Always cut from end with no connector/wire leads.

## Power Supply Wiring Diagram

**Note:** Prior to installation all 24VDC wires must be present near fixture. Refer to the power supply installation instructions for additional information.
