SPECIFICATIONS

- Fully sealed lamp shade
- High Efficiency, fully integrated proprietary LED Module
- L90 - 100,000+ hours. 10 years / 24/7
- 120-277 Vac Input
- 90 CRI (minimum)
- Color Temperature Select (CCT), Integrated four CCT select (2700K, 3000K, 3500K, 4000K) OPTIONAL (specify)

CERTIFICATIONS

- UL Damp Listed
- ADA Compliant
- IK10 UL Certified (protected against 20 joules of impact)
- Fully Sealed Shade
- Title 24 JA8 Certified

CONSTRUCTION

- Shade: Durable ARCHITECTURAL RESIN by ALVA
- Trim: Architectural grade metal finish. Optional Antimicrobial Finish (must specify)

LIDEA Deluxe

alva®

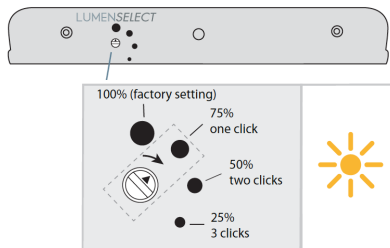

Fully Sealed Healthcare Grade Lamp Shade, High Performance Led Wall Sconce

LUMENSELECT™

LUMENSELECT™, a dimming control panel on all ALVA luminaires, allows you to customize light output to create the desired atmosphere and to limit the consumption of electricity. The LUMENSELECT™ rotary switch should be turned gently clockwise with a small flathead screwdriver with a 1/8" or 3mm wide tip, one click at a time from factory setting to get desired output level.

Setting LUMENSELECT™ Levels

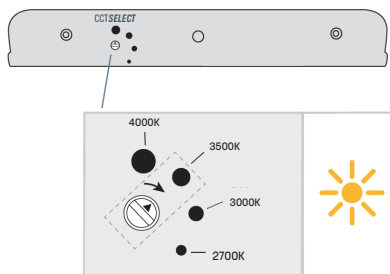

Set LUMENSELECT™ levels using the control panel on the end cap of ALVA luminaires. ALVA luminaires come factory set at 100% light output. You may choose from four output settings, typically performed at the time of installation:

- 100% light output & energy consumption
- 75% light output & energy consumption
- 50% light output & energy consumption
- 25% light output & energy consumption

CCTSELECT

Set CCTSELECT levels using control panel on the end cap of ALVA luminaires. ALVA luminaires come set at your call out in your order. If CCT is not indicated, your module will be set at 3000K by default.

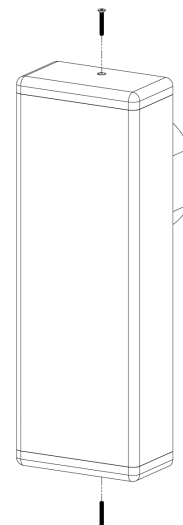

REMOTE DIMMING OPTION, 0 - 10V (100 - 10%)

0-10V dimming may be used with compatible dimmer controls (Please refer to alvalight.com for a listing of compatible dimmers)
