PRISCILLA Interior Wall Sconce

Installation Guide / REVISED 06 30 2026

PRISCILLA Installation Guide (1 of 2)

Required for Installation:

Philips screwdriver
4mm hex key
Drill (for ceiling mounting)
Small flathead screwdriver (for adjusting CCT Select)
Optional TORX set (if using tamper resistant TORX shade screws)

Included:

- LED module with universal mounting bracket attached to the module
- Decorative Priscilla shade
- Internal shade bracket
- (4) Shade mounting screws. TORX screws optional (specify)
- (2) M3 mounting screws

Sizes & Mounting Information

The Priscilla luminaire series is available in two lengths, 19" and 35". The luminaire may be mounted on the wall either vertically or horizontally. The luminaire may be mounted on the ceiling as well. *Note: Wall/Ceiling mounting hardware is not included due to the wide variety of wall materials. Customer should determine the appropriate anchoring hardware for their specific needs. ALVA recommends the use of #10 mounting hardware.*

CAUTION:

Be sure the power is turned off by either removing the fuse or turning off the circuit breaker. Installation must be in compliance with National, State and Local electrical codes.

PRISCILLA Installation Guide (2 of 2)

Installing your ALVA luminaire: *(For Behavioral Health Applications, please see instructions on page 4)*

1. Mount Internal Mounting Bracket to each end of the LED module using M3 screws provided (one per bracket).
2. Attach the mounting plate to the junction box with care to align the plate so that the luminaire is orientated properly. You may use holes provided in back plate or drill holes in back plate as needed. For the 35" model mount the additional mounting plates to the wall or ceiling with care to align the pre-drilled holes in the LED module with the mounting plate. Be sure to install anchoring hardware according to the manufacturer's recommendations.
3. Connect the electrical wires from the junction box to the electrical wires of the light fixture. Please see (page 5) if using 0-10V dimming functionality.
4. Place the LED module so that the pre-drilled holes in the side of the light fixture line up with mounting plate(s). Secure the LED module to the mounting plates using the 8/32 screws provided.
5. Mount shade to the light module using hardware included with the shade selected for your project. For resin or acrylic shades, you secure the shade to the LED module using a 4mm hex key at both ends of the fixture.

Included:

- LED module with universal mounting bracket attached to the module
- Decorative Priscilla shade
- Behavioral Health Mounting Insert
- (8) TORX Mounting screws for decorative lamp shade
- (2) M3 mounting screws (to mount Priscilla Behavioral Health Mounting Insert to LED Module)

PRISCILLA for Behavioral Health Installation Guide (2 of 2)

Installing your ALVA luminaire for Behavioral Health Applications:

1. Step One: Remove universal jbox mounting plate from ALVA S-1-16 LED module(mounted on the module via four M3 screws on the side).
2. Step Two: Mount universal jbox mounting plate to junction box using flat head construction screws, #8 (provided by others).
3. Step Three: Slide Priscilla Behavioral Health Mounting Insert onto LED module. Attach to top and bottom using M3 screws (provided).
4. Step Four: Mark the holes in the mounting rails using 3/16th drill bit. Squeeze mounting rails to be perpendicular to the floor. Drill out the anchor holes with a 1/4" drill bit. Install #8 x 1-1/4" wall anchors to the wall being very careful not to damage the LED module. Ensure that the anchors are flush to the wall. Install the Behavioral health bracket to the module. It is critical that Priscilla Behavioral Health Mounting Insert is mounted securely to the wall. As wall vary, proper hardware to be recommended and sourced by installer. Attach to the module using M3 screws provided. Install your #8 mounting screws through the rail holes.
5. Step Five: Mounting decorative lamp shape to the module/behavioral health bracket system. Using M3X16 TORX head screws, 4 per side.

DIMMING OPTIONS

Dimming Options:

Your Priscilla luminaire includes 0-10V Dimming as standard.

0-10V Dimming

Your Priscilla luminaire provides control wires accessible from the back of the fixture that provide 0-10V dimming. To utilize the 0-10V dimming you must provide control wires to the junction box. At the time of installation, attach Purple (DIM+) wire from back of fixture to DIM+ control wire from junction box. Attach Gray (DIM-) wire from back of fixture to DIM- wire from junction box.

Compatible and Tested Dimmers:

- Lutron® Model DTV
- Leviton® Model Decora ® Illumatech™ IP710-DLZ
