NOTE: Prior to installation all 24VDC wires must be present within 72" of the installation. Refer to the power supply installation instruction for additional information.

NOTE: More than one person is recommended for this installation.

1.1 Screw mounting clip to stand off hub. Use plunger to adjust the length of aircraft cable.

1.2 Fix the plexineon fixture into installed mounting clips. See step A for clipping instructions. Make sure mounting clips are certain distance apart.

NOTE: Standard Clips and Decorative Clips have different required spacing.

standard mounting clip
30" space

decorative mounting clip
18" space

Install Fixtures into Mounting Clips

A.1 Make an U shape with mounting clip installation tool, insert two edges into mounting clip. Place plexineon fixture inside the shape. Then push the fixture into clip.

A.2 Remove the tool. Make sure mounting clip is clipped right on the grip.

ceiling

plexineon fixture

stand off hub

NOTE: Prior to installation all 24VDC wires must be present in junction box. Refer to the power supply installation instruction for additional information.

2.1 Align one standoff hub to the junction box and mark the other hubs' location to the ceiling.

3

junction box

3.1 Slide power cord end through strain relief, canopy, and cross bar. Peel back power cord to expose wires. Connect red (24VDC+) and black (24VDC-) power supply wires to fixture red and black wires. Waterproof wire nuts recommended in this step.

NOTE: Prior to wiring the desired fixture height must be determined to cut off any un-necessary wire.
