[REDACTED] Is Jeffrey on island? I couldn't help but notice the bright lights. Are they beamed at St. John? If they are radiating into 2 pi steradians, their energy output is prodigious. I am down through Monday. Killer sunset this evening.

All the best,

Our next scheduled stays on St. John will be April 6 to 24, and October 12 to 26. Additional opportunistic visits during unbooked weeks are possible, and I would very much enjoy a chance to sail over and meet Jeffrey, so do keep me posted on visits. I was down at Harvard today, and they are doing some truly wild things with stretched DNA.
