ok, good to know on the cabinets cost...  
I am contemplating 2 ideas when it comes to appliances:

1. Microwave and warming drawer where you have them, and only do a single oven where you have a double oven..
2. Put the microwave, oven and warming drawer all in the same column where you show double ovens now...

Just wondering if I would prefer to have the microwave closer to the fridge...i do WAY more cooking in microwave and stove top than the oven...Any thoughts?

No, that wouldn't change the price.....might go down a little bit.

Cabinet to the right of fridge has microwave and warming drawer.

Hi Michael...hope you're having a good day! If I wanted to do all the cabinets in Cherry Raisin except for the middle island (make the middle island with the designer white cabinets) would that change the cost? I'm sure I know the answer to this...yes... So basically, if the counter is white corian, the cabinet is cherry raisin, and if the counter is the wide plank walnut, then the cabinet would be white...the island that is 2 heights would be cherry raisin cabinets with the lower counter top white corian and the upper counter top wide plank walnut..

Also, what are the appliances you have to the right of the fridge?

Lesley,  
Sorry for the delay! Attached are two elevations of the kitchen, based on our conversation.

All plywood construction  
Inset

All cabinets except peninsula to family room:  
Maple  
Designer white

Penninsula cabinets:  
Cherry  
Raisin

\$47,500 plus tax

There is a promotion going thru May 1 which would reduce that by \$2850. Additionally, we have a promotion going thru April 13 which would take an additional \$500 off, bringing the price to \$44,150 plus tax.

Please call me if you have questions.

Regards,
