My cousin sis=er has been diagnosed with atypical depression (she isn't really unhap=y, but had a sever OCD - will get up at night and start rearranging her cl=sets; has a sleeping disorder - can't sleep without the pills; panic a=tacks, anxiety). She has been taking antidepressants + neuroleptics. She w=nts to get pregnant and stopped dating antidepressants, then started going=crazy. Started taking 5 htp and it helps a lot (plus neuroleptics). Can sh= continue like that and get pregnant. Can't find much info on 5htp and=the consequences (she will stop when she gets pregnant).

She has been like this for 13 years and is has been getting worse=C2
